NOTICE OF INTENT TO CIRCULATE PETITION

Notice is hereby given by the persons whose names appear below of their intention to circulate the petition within the City of Santa Monica for the purpose of prohibiting medically unnecessary genital cutting of male minors. A statement of the reasons of the proposed action as contemplated in the petition is as follows:

1. Genital mutilation constitutes a major health risk, violates human rights and has lifelong physical and psychological effects. Complications due to male genital mutilation include hemorrhage, infection, excessive skin loss, skin bridges, nerve damage, glans deformation, bowing, meatal stenosis, loss of penis, and death. Long-term complications include sexual dysfunction, decreased sexual sensitivity, increased friction and pain during sexual intercourse, and lifelong psychological trauma.
2. It is time for Santa Monica to join with genital integrity and human rights organizations to condemn this harmful and outdated procedure. Criminal investigations and prosecutions should be carried out, when necessary, to send a strong message that Santa Monica abhors this practice and views its abolition as paramount to the health and welfare of these young children.
